What did you like most about this course and/or the instructor's teaching?

the tests were fair and allowed for a wide range of ways to show you know the material.
really liked all the examples

What about this course and/or the instructor's teaching needs change or improvement?

I wish the mathy parts were changed into code at first the slowly transition. or show many examples of what math equals what code. I really wish the assignments had MUCH more clear instructions on how to start so they didn't feel so impossible to even attempt.

What did you like most about this course and/or the instructor's teaching?

I liked the testing & assignment format

What about this course and/or the instructor's teaching needs change or improvement?

maybe a tutorial/Lab on using Racket would be helpful in the future. The tutorials on Dr. Racket were irrelevant to the course content.

Additional comments:

I did like how similar Racket's syntax was to the mathematical constructs. But maybe more explanation into How to use it for the class.

What did you like most about this course and/or the instructor's teaching?

What about this course and/or the instructor's teaching needs change or improvement?

Lectures are very confusing and abstract. Often, I feel I gained no information from class because things moved too quickly and were not explained enough. Exams for a CS course should not be essays. Homework for a CS course should not be videos.

Additional comments:

On the website, it says "intentionally vague". This is not what I expect from a high level CS course. more detail, and rubrics would improve things.

What did you like most about this course and/or the instructor's teaching?

Jay really cares about his students & makes himself available to us. He is all-knowing, at least on this subject matter.

What about this course and/or the instructor's teaching needs change or improvement?

Material is confusing - from the very start, I was pretty lost & never quite got solid footing. More concrete examples / connections to what students already know would help, as would more frequent assignments with checkpoints so we don't get behind. The programming assignments were really hard to understand

What did you like most about this course and/or the instructor's teaching?

Extra credit opportunity on tests was nice.

What about this course and/or the instructor's teaching needs change or improvement?

lectures were hard to follow. Too much dense theoretical material all at once. The Proofs were hard to follow and I often felt the information in class was insufficient preparation for the assignments. The assignment instructions were always far too brief. I felt he did not explain the concepts at a level that was comprehendible to me as an undergrad.

What did you like most about this course and/or the instructor's teaching?

Passionate & Knowledgable

What about this course and/or the instructor's teaching needs change or improvement?

- More Concrete examples
- no one can read racket. It's explained as it's being typed, but when something is referenced, we cant look back and recall what it said
- 2-3 character variable names are not descriptive enough

What did you like most about this course and/or the instructor's teaching?

I liked the real-world applications of PL theory and how they were displayed through code

What about this course and/or the instructor's teaching needs change or improvement?

The instructor is extremely intelligent but he lacks the ability to teach the material to a layman. He teaches as though he is the one who is the student which makes it hard to follow. Jay - we are but mere mortals!

Additional comments:

Very intelligent guy would have loved to hear more about formal verification and proving the correctness of code

Slow down!

Additional comments:

I sometimes have to re-watch lectures multiple times before I understand the content. We need an intro to Rational class to keep up with in-class coding demo's.
