What did you like most about this course and/or the instructor's teaching?

I liked writing the papers. I felt that I learned a lot of the things in the class doing research on the papers. I like how Jay tried to Humor us so we would pay attention in tense topics.

What about this course and/or the instructor's teaching needs change or improvement?

I think Jay should explain key terms more thoughly. I would always get lost, and taking notes takes away from pace of the class. If Jay wrote down the definitions of key terms on code he wrote.

What did you like most about this course and/or the instructor's teaching?

The class website is clear on what is being covered and how our work would be graded. The lectures were helpful and I liked that the book was publically available.

What about this course and/or the instructor's teaching needs change or improvement?

With the ability to calculate my grade and the amount of assignments that can be done for extra credit, I found myself "gaming" the assignments so that I could do the least amount of work while still getting that acc. I would have learned more if I hadn't done this, and it is my fault. But I'm adding it here for your information.

What did you like most about this course and/or the instructor's teaching?

Essays should be more frequent, as I learned the most from those.

What about this course and/or the instructor's teaching needs change or improvement?

A system that shows a student's progress, such as on Blackboard, would aid in increasing my morale with the course grade. Currently, grades are added together to form a final grade in the end. I would like to see my average grade adjust according to my assignment grades, and not just be added to a total.

Additional comments:

Jay is a great professor that is very, very qualified. He needs to change the way his class is structured so his students can better succeed.

What did you like most about this course and/or the instructor's teaching?

I thought that a lot of the later topics were very interesting and well explained. I also appreciated how accessible the professor was outside of class. The writing assignments also helped me to better understand the topics we talked about.

What about this course and/or the instructor's teaching needs change or improvement?

This course was very overwelming. There were so many assignments that I felt as if I had to do them all, which was very stressful. The biggest problem was that assignments were out of sync with the topic we were currently talking about.

Additional comments:

My suggestion is to have writing assignments before coding ones so students reinforce their understandings of concepts before coding.

What did you like most about this course and/or the instructor's teaching?

I think I learned a lot, and now am able to think in different ways, which was very valuable.

What about this course and/or the instructor's teaching needs change or improvement?

I think this professor is very intelligent, and I feel that sometimes he doesn't realize that we are just lowly students who don't have a deep and innate knowledge of racket right away. There needs to be more of an adjustment period... knowing no racket to 3 weeks later writing a racket interpreter was very intense.

What did you like most about this course and/or the instructor's teaching?

A nice guy who obv knows the material.

What about this course and/or the instructor's teaching needs change or improvement?

Grading was vague / unclear at times. getting scores of 0 to 1 sucks & is demoralizing. A lot of my friends are retaking this course next semester because of how unlike any other course this is.

What did you like most about this course and/or the instructor's teaching?

lots of choice

What about this course and/or the instructor's teaching needs change or improvement?

ON a 1-10 scale (10=best) Jay's intelligence is a 10. He assumes we are all 7-8 and teaches as such. We are more like 5-6. Im talking about experience more than "smarts". Assignments are to hard when coupled with teaching a new language that is so unlike everything els we are taught here.

Additional comments:

I still have no idea what I was supposed to learn.

What did you like most about this course and/or the instructor's teaching?

JAY IS ENTHUSIASTIC ABOUT OPL

What about this course and/or the instructor's teaching needs change or improvement?

ABSOLUTELY UNREASONABLE EXPECTATIONS FOR ASSIGNMENTS. MAYBE THEY SHOULD NOT be designed to make students feel so awful about themselves, or as Jay puts it - "shame to inspire". No inspiration going on here when everyone hates themselves.

Additional comments:

We aren't looking for handouts, but don't design your grading rubric to make people feel so awful about failing everyday.

Written comments about this course and your instructor are encouraged. Please be assured that these forms will not be returned to your instructor until after grades are submitted.

What did you like most about this course and/or the instructor's teaching?

Prof McCarthy is a brilliant man who effectively and insightfully communicates advanced concepts in his lectures and provides challenging assignments. I felt well challenged by this course regardless of my time investment.

What about this course and/or the instructor's teaching needs change or improvement?

More guidance offered with assignments in terms of a starting point would be preferable

Additional comments:

Grading is very unforgiving, and it is demoralizing to get a 0-25% on an assignment after spending 20+ hours working on it. But I would take this class with McCarthy every time.
